

URBAN ARCHAEOLOGY: TOWARDS HIGH DEFINITION

29 May, 2013

13.15 - 16.30

Moesgaard Auditorium 5

MCH seminar organized by the ENTREPOT project

Evolving analytical techniques related to site biographies and artefact analysis allow new approaches to the study of cultural and economic networks in the past. The challenge of 'high-definition archaeology' is transforming archaeology's ability to characterize the scale and pace of events and processes in the global and interregional dynamics of urbanization, seafaring and colonization. The prospects are considered in the context of current work within the project "Entrepot. Maritime Network Urbanism in Global Medieval Archaeology"

PROGRAMME

- 13:15 Søren M. Sindbæk: *Introduction*
- 13:20 Ashley Coutu: *Connecting early medieval trade patterns with biomolecular methods: identifying and sourcing antler and ivory artefacts from the Atlantic to the Red Sea*
- Discussion
- 14:00 Sarah Croix: *Urbanism and site biography – the case of Ribe*
- Discussion
- 14:40 Short break and coffee
- 15:00 Mateusz Bogucki: *Coin circulation in early towns – the evidence of single finds*
- Discussion
- 16:00 End

For further information please contact Søren M. Sindbæk, leader of ENTREPOT project
